## **2.2.1.** The institution assesses the learning levels of the students and organizes special Programmes for advanced learners and slow learners

For the slow learners teachers shared links of YouTube videos on basic concept of the subject and also provided MCQs in respective subjects. 2020-21 being the pandemic year one to one interaction through physical mode could not take place. However, teachers were always available to the students on one to one basis for helping and solving their subject related difficulties through online modes like WhatsApp group, Google Classroom etc. Some of the screen shots are shown below.
