

7.1.5. Green campus initiatives include - Evidences

1. Restricted entry of automobiles:

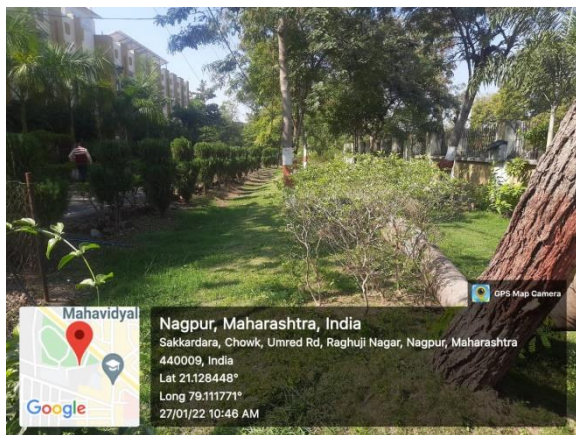

No unauthorized vehicles are allowed to enter the college premises. The main college building is quite away from the main entry gate. After the vehicle enters the main entry gate, separate parking slots are available for bicycles, scooters and cars. These parking slots are away from the main teaching building and hence there is no noise pollution around the class rooms and laboratories.

2. Ban on use of Plastic:

The college educates the students about harmful effects of plastic on environment and mankind. College has displayed boards to spread awareness among students to minimize the use of single- use plastic. In the coming years college is aiming to complete ban of single use plastic from the campus.

3. Landscaping with trees and plants:

In the green campus initiatives many medicinal, fruit plants and trees have been planted in around the periphery of the campus. A beautiful landscaping is done in the campus area with trees and plants.

4. **Use of LED:** Lightings at many places of campus were replaced by LED as these are energy savers and emits low radiated heat.
